

# Conflab Health

#### The Perfect Prescription for Remote Consultation

#### The future of healthcare

As medical resources are soaked up by the demands of Covid-19, there has been increased pressure to reduce face to face interactions. Clinicians need solutions that support the move towards remote processes and provide a safe service that patients can trust and rely on.

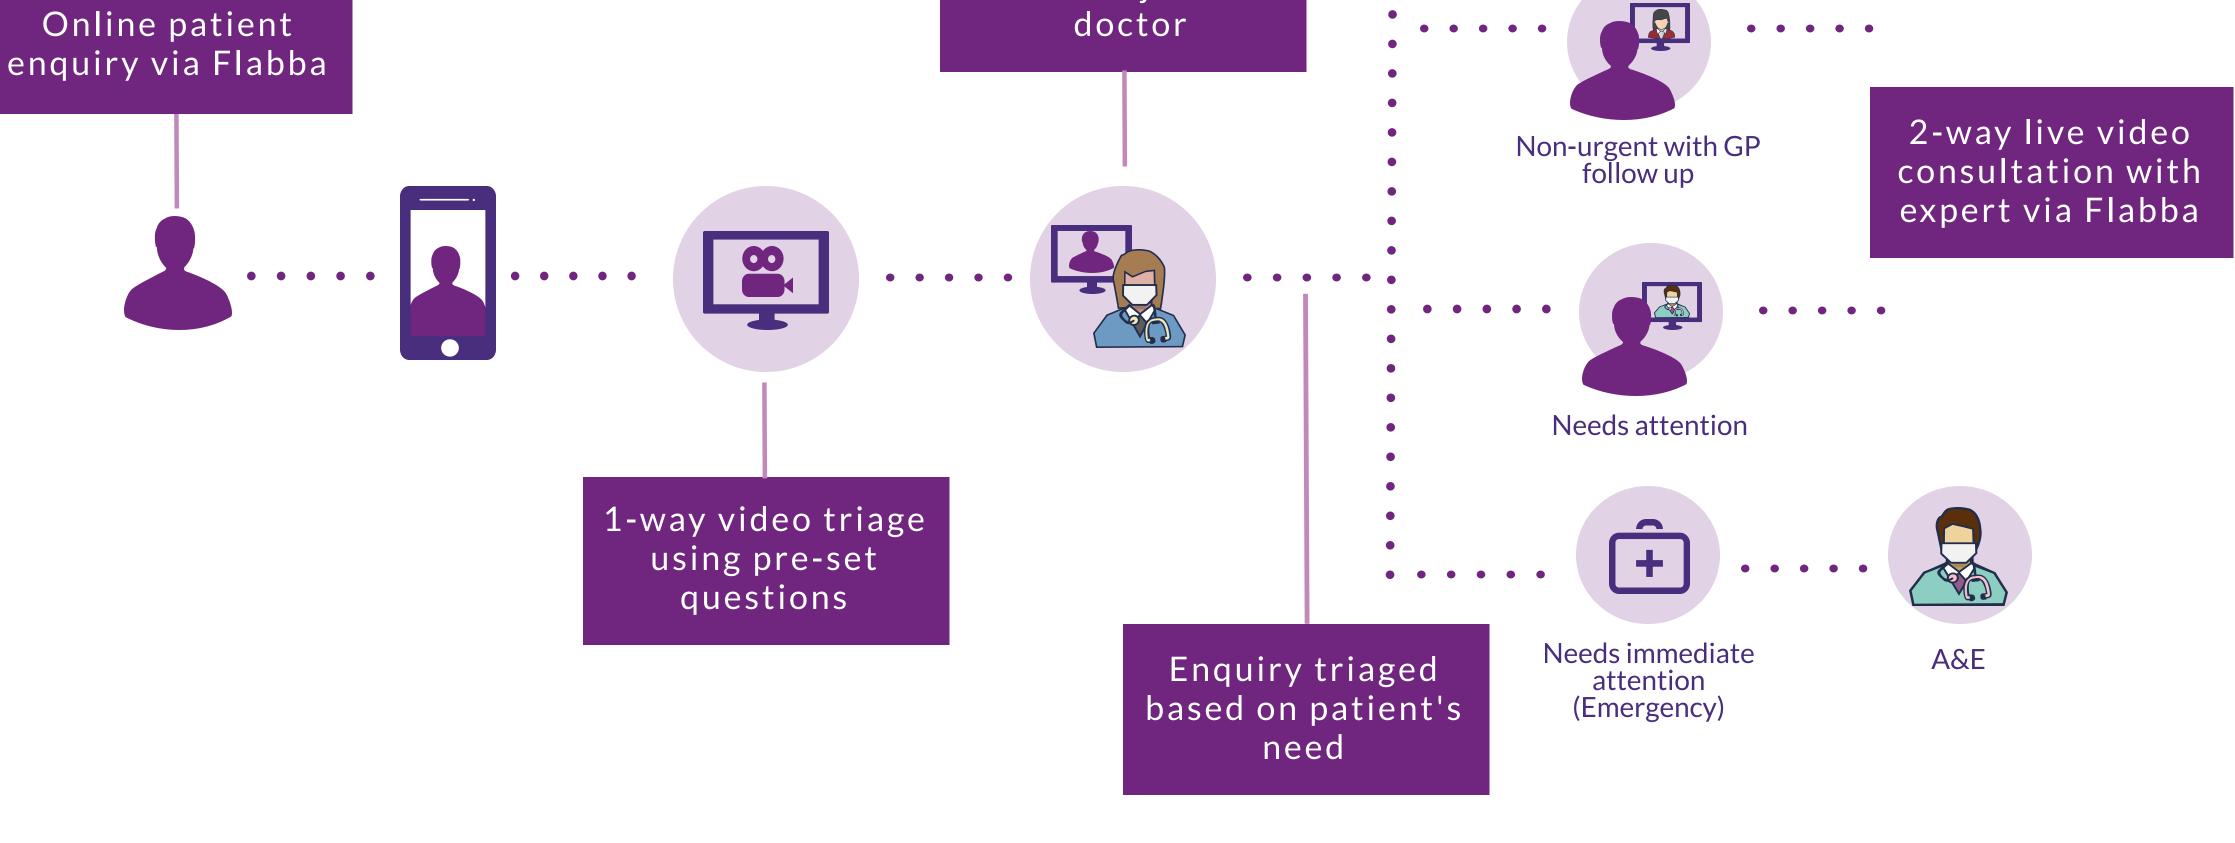

Introducing Flabba, offering feature-rich video and telephony one-way and two-way remote patient consultations that enable clinicians to engage safely and more productively with their patients. Now with Flabba, you can remove the need for vulnerable patients to attend clinics in person, without affecting the efficiency of your practice.

#### More efficient end to end remote consultation workflows

#### 14 Reasons to choose Conflab Healthcare

#### Live multi participant

Invite any amount of people to a live online video consultation.

#### Triage one way consultations

Ensure clinicians use their time most effectively and patients are not kept waiting for unnecessary face to face appointments.

## Secure direct messaging

Send secure encrypted direct messages between patient and clinician and or to groups. Includes ability to securely share documentation.

### Scheduling/ Booking

Scheduling & booking feature with integrated diary management with messaging and reminders configurable and sent over both email and text format. All bookings are easily viewed from both a clinician's and a patient virtual waiting room.

#### Screen share with annotations

Clinicians can share their screen and take notes to be saved to the patient files.

#### iOS & Android app versions

Enjoy all of the core Flabba features but from within a secure downloadable App for ease of use.

## Self service booking

Patients can book live 2-way video consultations, at times convenient to both them and the clinician. Integrated diary management ensures patients cannot book times where clinician is not available.

### Automated messaging

Messages and reminders are automatically sent out to participants throughout the process. Patients and clinicians are prompted to attend consultations and to provide required documentation ready for upcoming consultations.

### In call document referencing

Upload documents, scans & X-rays to be reviewed during consultations, verify and digitally sign documents through the Conflab Healthcare platform

## Replay, review & rating

Securely collaboration with clinical colleagues. Ask them to Review, by replaying the recording, adding their own notes and rating the responses, enabling greater degree of diligence.

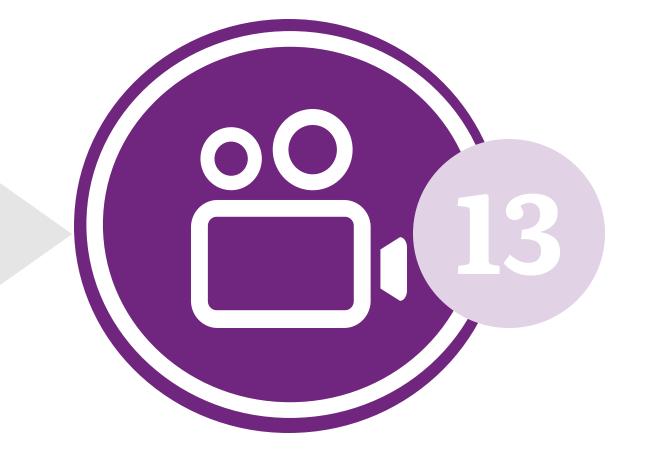

## Structured questions

Pre-define questions to be discussed during a consultation, ensuring standardisation and enabling 'fast-forward' to particular section of recording during review or audit process.

Note taking

Medical notes can be taken during a video consultation. Notes are stored against the consultation, clinic and patient record and can be downloaded into a PDF.

## Recording of video & tele

Video & audio media can be securely recorded and stored against the clinic and patient record for easy retrieval. Choose to record video & audio, audio only or turn it off as required.

Time stamping

As a new question or topic is discussed during a consultation, Conflab Healthcare automatically creates a time stamp on the recording, ensuring that you can easily find the relevant information when you review the consultation.

#### Conflab Health

Conflab Health enables you to take advantage of workflows and the automation of business processes. Drive efficiency, save costs and improve patient care. Using simple tools for booking and scheduling appointments and document management to ensure you and your patients have easy access to essential documents and medical images.

Combine this with interactive audio and video recording and streaming, to provide a unique and s lick solution to managing your remote patient consultations.

#### Fewer missed appointments

Remote patient consultations are an essential tool to reduce waiting times, clear back logs and b ring a personal service back to healthcare

#### Bring healthcare into the home

Conduct comprehensive consultations with your patients as if you were right there next to them. Bring health care right into the homes of those who need it.
