

Conflab Visa

Remote Applicant Assessment.

Fast, efficient, compliant and secure visa applications.
Workflow automation for scheduling, processing, sharing and management.

Conflab Visa is a unique software solution that enables you to efficiently and securely manage large numbers of visa applications using video interviewing of applicants anywhere in the world and then share and collaborate with colleagues or case workers who are assessing suitability.

Simple steps providing a complete solution

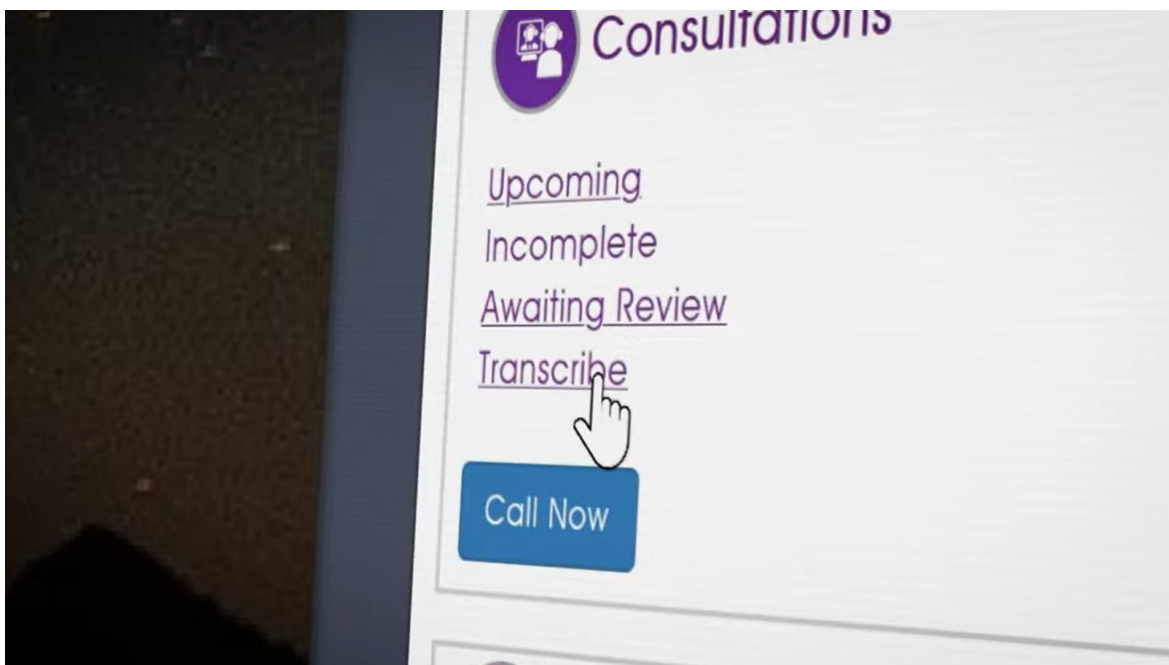

This intelligent video solution wraps workflows and automation around all the steps needed to schedule, record, process and share applications with the relevant teams. And recordings provide full audit and compliance for dispute resolution.

Improve efficiency, save time

Rather than repeated face-to-face interviews, use Conflab Visa to more efficiently work through the processes, leaving you more time to interact with the applicants. Send predefined questionnaires, record one or two way video applications, schedule and book next steps and keep everyone informed with auto-notifications, text and message alerts.

Secure, scalable process management for recruitment

Conflab Visa provides you with the technology to improve business processes, increase security, efficiency and compliance, so you can focus on the human touch.

- Securely record all your video and telephone applications
- Share those interviews and the associated documentation with other teams
- Use virtual waiting rooms and self-service booking to schedule interviews easily
- Record from anywhere in the world and then distribute to any relevant party on any device
- Securely share interviews for easy review and audit
- Auto Transcribe all audio files using AI transcription any future appeal or review
- Document management stores recordings and documents to profiles and applicants
- Two way messaging and communications, with text and email alerts
- Customize to reflect your brand
- Secure and compliant audit trails of activity
- Full integration to your CRM and recruitment software
- Create your own reports, or use the large range of management and operational reports already designed.
- Ability to configure multiple user profiles for different teams and external suppliers
- UK Government approved security. ITHC 2019, ISO 27001, Cyber Essentia

Scheduling, booking and messaging made easy:

Automate the time-consuming task of booking interviews and sending reminders. No more time wasted, waiting for the applicant to arrive, instead receive recordings and review systematically or share with colleagues.

Record from anywhere and share simply:

No more struggling with broadband and connectivity issues, waiting while sound and vision flicker. Pre-recorded questionnaires and interviews enables you to review all interviews in a single, convenient folder and playback easily. Track and audit every step and keep documents associated to the applicants.

Advanced AI Technology

As an intelligent video solution, Conflab Visa comes equipped with advanced AI technology that uses a cutting-edge algorithm to automatically transcribe your interviews into readable text documents for easy sharing and quick reporting.

Conflab Visa

With intelligent workflows, secure connections, dashboard reporting, and AI transcription, you can increase efficiency in the way you accept, review, and approve your applications. Conflab Visa is an intelligent way to manage visa applications.

Critical Compliance for Remote Applicant Assessment.
